## CHALLENGES WE ADDRESS

- Existing services on the market don't meet consumer expectations for low-cost, on-time delivery.
- Trade tensions and the potential impacts of the US withdrawal from (or renegotiation of) UPU agreements will significantly increase the cost of shipping.
- The STOP Act in the US now mandates Advanced Electronic Data (AED) on 100% of parcels shipped from China to the US. This risks returned parcels for as much as 50% of US-bound shipments.

## WHAT WE OFFER

- PB offers a comprehensive, mix and-match modular solution for end-to-end delivery service from international origins such as China to the US.
- We leverage a network of trusted partners for parcel pickup, consolidation and international transportation.
- We specialize in US commercial customs clearance, domestic processing and last mile delivery.
- We offer some of the leading US domestic fulfillment and returns services.

## HOW WE'RE DIFFERENT

- Delivery service within US within 5 days
- Warehousing & transportation capabilities
- Flexible, zone- and volume-based tiered pricing and no delivery area surcharges or holiday surcharges
- Address correction services
- API label printing (with servers in Hong Kong for speed & continuity)
